EIBA ANAS ABDALLA

Full-Stack Software Engineer | Project Coordinator

Istanbul, Turkey (open to relocation) | +90 530 615 4677 | ebaaanas789@gmail.com

ebaa-anas.github.io | linkedin.com/in/eiba-anas-abdalla-a164642b6 | github.com/ebaa-anas

PROFILE

Software engineer who also works on the operations side. I design and build full-stack web applications, from database design to the interface, and work directly with the teams who use them. Experienced in event logistics, program design and partner coordination, and comfortable working between technical and non-technical teams in Arabic and English.

CORE STRENGTHS

Full-Stack Web Development • React & TypeScript • REST APIs & PostgreSQL • Database Design & Security • Event & Warehouse Logistics • Program Design • Stakeholder Coordination • Technical Writing

PROFESSIONAL EXPERIENCE

Project Coordinator, Logistics

Sep 2026 – Present

Al Sharq Forum · Istanbul, Turkey

- Responsible for the depot side of logistics for the forum's 10th conference: preparing what each location needs, tracking stock, deliveries and returns, and staging items per location before the event.
- Support procurement preparation with the logistics team.
- Designed and built the team's logistics platform (Inventory, Venue Map, Procurement, VIP Travel), delivering and improving it while working alongside the team.

Program Design & Coordination Intern, Young Business Hub

Mar 2026 – Present

Islamic Cooperation Youth Forum (ICYF) · Istanbul, Turkey

- Helped organize the OIC Youth Entrepreneurship Conference (June 2026, Istanbul Financial Center), held with Türkiye's ministries: researched startups to shortlist for invitation, then coordinated with invited startups on event information and their exhibition setup.
- Supported the organizing team across all ICYF youth camps: participant coordination, documentation, reviews and preparations.
- Helped facilitate an AI skills workshop series for OIC youth, delivered with a UK social enterprise partner.

Software Engineering Intern

Jan 2026 – Feb 2026

EVA Team, Altınbaş University · Istanbul, Turkey

- Worked on autonomous robotic systems in a 20-day internship and documented the team's architecture and simulation workflows.

Front-End Developer Trainee

Jun 2020 – Aug 2020

Nilogy Company · Khartoum, Sudan

- Turned client briefs into working HTML, CSS and JavaScript interfaces across several projects on fixed deadlines.

PROJECTS – BUILT & SHIPPED

Al Sharq Depo MS – Conference Logistics Platform

Deployed live + public demo

React, TypeScript, Node.js/Express, PostgreSQL (Supabase), Render

- Used by the logistics lead and team to run the depot: stock, what each location still needs, deliveries and returns, procurement against budget, and VIP speaker travel (flights, hotels, transfers).
- Role-based access: the lead and team manage operations, volunteers have view-only access, and a read-only Venue Map link lets other Al Sharq teams follow venue readiness.
- Postgres row-level security, hashed invite tokens and nightly automated database backups through GitHub Actions.

Athar – AI-Driven Volunteer Platform for Disaster Response Live prototype

React, TypeScript, Firebase, Vercel, Vitest

- Built a full-stack volunteer platform with three portals (volunteer, organization, admin), supported by the TÜBİTAK 2209-A research program. It's a live prototype with no users yet.
- Designed skill-based crisis dispatch: reserve volunteers are ranked by matched skills, and the number paged is capped at 3× the number needed.
- Implemented three-tier organization verification and Firestore security rules for roles and verification, covered by 36 emulator tests.
- Added an AI role-play training simulator and AI situation reports. Both run through serverless proxies that fall back across Gemini and OpenRouter models, so API keys stay server-side.
- Wrote 141 unit and component tests with Vitest and Testing Library.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, SQL, HTML, CSS
- **Frontend:** React, Next.js, Tailwind CSS, responsive design
- **Backend & Data:** Node.js, Express, PostgreSQL, Supabase, Firebase (Firestore, Auth, Cloud Functions)
- **Testing:** Vitest, Testing Library, Firebase Emulator
- **DevOps & Tools:** Git/GitHub, GitHub Actions, Render, Vercel, Ubuntu, VS Code

VOLUNTEERING & COMMUNITY

Liaison Officer, Protocol Team Al Sharq Youth 9th International Conference, Istanbul · Nov 2025

- Completed 100 hours of volunteer service at "Tashkil Al Sharq: From Vision to Action", handling communication and on-site logistics for high-level delegates.

International Delegate 7th ICYF International Young Volunteers Camp, Antalya · May 2025

- Joined youth from 50+ countries for training on the psychosocial wellbeing of young volunteers.

Young Climate Volunteers Camp ICYF with SESRIC, OECD and Cemre Foundation · Istanbul · Apr 2026

- Completed a 9-hour training on climate action and building climate-resilient communities.

International Media Training Camp ICYF with Fokus Plus · Antalya · Oct–Nov 2026

- Completed "Journalism for Juniors", a 9-hour international training in journalism and media production.

EDUCATION

B.Sc. Software Engineering 2022 – 2026

Altınbaş University · Istanbul, Turkey

- GPA 3.67 / 4.00. Graduation project became Athar, supported by the TÜBİTAK 2209-A research program.

B.Sc. Information Technology (not completed) 2016

University of Khartoum · Khartoum, Sudan

CERTIFICATIONS & TRAINING

- Software Development Using AI, 7-week program – Core Istanbul (included a team hackathon)
- Python Data Structures – University of Michigan
- Python Training Certificate – Frontier Tech Leaders (FTL) Sudan
- Teacher Training Certificate (TTC) – WAVES Training Center

LANGUAGES

Arabic (Native) • English (Fluent) • Turkish (Beginner)
